SUMMARY

Java developer who loves building scalable apps with Java Spring Boot. I'm all about creating data-driven features that make products faster and users happier. Eager to jump in with my coding skills, sharp problem-solving, and team-player attitude to help design and launch cool stuff.

PROJECT

1. Free Movie Streaming Platform - NoCostNights

The full-stack app with Java, Spring Boot backend, HTML/CSS frontend. Key features: real-time news feed, auto-pagination for new movies, movie search by name via Spring Data JPA. Demonstrates MVC, REST APIs, MySQL integration, and responsive UI for scalable streaming.

2. Personal Portfolio Website

Created responsive portfolio with HTML, CSS, JS to showcase projects, education, resume, and certificates. Added smooth scrolling, CSS animations, and JS-powered project gallery with filtering/modals.
